

It's simple math

Ag-Bag has the answer

There is something you can do about rising feed costs...keep more of what you store! That's what the Ag-Bag system can do for you. You'll have better quality feed, and more of it. Get more info from your Ag-Bag dealer.

- | | |
|---|--|
| 1. More milk produced. | 6. More palatable than bunker-style silage. |
| 2. Higher dry matter intake. | 7. Unlimited storage capacity. |
| 3. Higher nutritional value. | 8. Less need for higher cost supplements. |
| 4. Significantly less dry matter loss. | 9. Better herd health |
| 5. Segregated feed storage.
Test a new corn silage hybrid.
Keep 1st, 2nd and 3rd crop hay separate. Easily adjust rations for dry cows, heifers, etc. | 10. Scientifically superior feed, healthier cows, lower storage costs, higher resale value...and more. |

Experience the new Nitro 4000 Series award-winning suspension, smooth ride and Ultra-Quiet cab in the Ride & Drive Area.

More milk per ton of silage

Bunker-style storage loss can cost \$10,000 for every 1,000 tons of silage.

NOTE: Calculated at \$50/ton silage value with 20% bunker loss due to spoilage and shrinkage.

THE FIRST NAME IN SILAGE QUALITY
